

FILTER TIPS

Preliminary announcement of the new Model 195 Continuously Variable Inductor! A new Allison product to give you an item in your sales bag of tricks.

The 195 is a new use for the patented Allison variable inductor. One model with a range of 1 millihenry to 10 henries -- a 10,000 to 1 change! Applications are in design of filters, delay circuits, equalization circuits, oscillators, etc. Every lab should have several at the low price of \$95.00 each. It will soon appear in the "New Products" sections of the electronic and electrical publications. A new ad is being prepared to follow this up in Electronic Products, Instruments and Apparatus News, and other publications.

A technical data sheet is in preparation and will include curves of L, Q, current handling, etc.

Delivery approximately 60 days.
